Subject Index

Amide host 149

Barbiturate receptors 45

Calix[4]arene
  complexes with
    polycyclic aromatics 137
    steroids 341
Calix[6]arene
  complexes with steroids 341
Calix[8]arene
  complexes with steroids 341
Catalytic transfer hydrogenation 247
Cholic acid complexes 397
Clay complexes 123
Complexation equilibrium constant 9
Computer simulation 9
Cyclic-D, L-hexapeptide host 27
Cyclodextrin
  azides
    use in catalytic transfer 247
    hydrogenation 247
  polymers 385
Cyclodextrin - *alpha*
  complex with
    amino acids 291
    a-D-glucopyranose 275
Cyclodextrin - *beta*
  complex with
    amino acids 291
    conjugated enones 81
    3,5-dimethylbenzoic acid 211
    emulsified cetostearyl alcohol 331
    fluorenone 237
    a-D-glucopyranose 275
    phenothiazine 69
    (*R*)-(+)-pulegone 369
  methylation using phase transfer catalysis 307
  photoxidation of phenothiazine complex 69
  selective reduction of pulegone complex 369
  stereoselective reduction of complexes 81
Cyclodextrin - *beta-dimethyl*
  complex with
    conjugated enones 81
    nonionic surfactants 229
    (*R*)-(+)-pulegone 369
  selective reduction of pulegone complex 369
  stereoselective reduction of complexes 81
Cyclodextrin - *beta-2-hydroxypropyl*
  complex with
    amino acids 291
    antibiotics 265
    nonionic surfactants 229
    phenolphthalein 301
    phenothiazine 69
  photoxidation of phenothiazine complex 69
Cyclodextrin - *gamma*
  complex with
    azo dyes 255
    a-D-glucopyranose 275
Cyclotetrachromotropylene complexes 93

Diamondoid network 161
Differential scanning calorimetry 115, 341

Enantiomeric recognition 353

FT-IR spectroscopy 123, 341
FT-Raman spectroscopy 123

Gas-phase binding affinities 37

Intercalates of
  aluminium dihydrogentriphosphate 193
  layered double hydroxide 59
Interlayer polymerization 193

Metalloporphyrin hosts 177
Molecular modelling 45, 275

NMR spectroscopy
  ^{11}B MASNMR 161
  ^{13}C MASNMR 161

Pentaborate anion hosts 161
Pyridino-crown 1

Ritter reaction 149

Synthetic ionophore 377

Tetra(4-pyridyl)porphyrin complexes 177

Urea fatty acid complexes 115

Werner host complex 317
